

The Molecube: the essence of sunwear design

For the 2016 season the Molecube of the Derapage sunglasses collection represent the essence of modern design. The patented Molecube hinge remains at the forefront of innovation and characterizes a collection that offers new frames and structure design with models available in both in both metal and metal acetate combinations.

The sunglasses are ultra light with nylon eco-compatible lenses. The anti-reflection factor of 0.7, offers some of the highest UV protection on the market and the soft rubber temple tips and patented molecube hinges ensure an unparalleled comfortable fit.

The opaque finishes of the metal frames are available in classic ultra black, brown and midnight blue along with a gloss finish gun metal grey underlining the technical, aesthetic and masculine design of the glasses. The acetate and metal combination models are available in havana, black and cornfield blue. The acetate rims enriching and giving importance to the metal frontal frames and temples. Shape and size are unexaggerated creating the perfect balance between ultra light minimalist design and meticulous personal style.

THE LOOK IS FOR THOSE WHO DARE.
