

**VANNI believes that colour in an inexhaustible universe of light and splendour. A call back to life, an invitation to find your own original and personal style that says something about you. Colours by VANNI is a vibrant collection of acetate optical glasses, that redefines a refined and classic style.**

### **Raw Material:**

different coloured acetates glued together.

### **Design Detail:**

lines that never lose balance; a symbiosis between the block colour of the front of the frame and the two vertical lines on the lug, lines being very much part of fashion trends this year. Some models have a particular key hole bridge.

### **Shapes and Colours:**

the colours are what this collection is all about: for season 2017-2018 refined graduated colours enrich existing model, shading tones of blue, prune, green and acquamarine. The radiance of the frontal frame is accentuated at its side by the original temples in a colourful havana. Completing the collection are models in tender opaline pastel colours highlighting the translucent quality of the acetate with the added detail of vertical stripes of contrasting shade on the frame lug. Shapes are balanced; either panthos or the classic rectangular.

VANNI eyewear is made in Italy, for sure.
