

VANNI

MADE IN ITALY, FOR SURE.

VANNI RASTER SUN Sunglasses VANNI-style

Bold choice, bold styles: VANNI's collection of sunglasses for the new season continues to surprise. A touch of VANNity: and this time we really make you look good. The brand famous for its exclusive acetates and unequivocal style has decided to play with fire and launch a very idiosyncratic collection; setting alight our unique designs with our famous VANNI acetates.

Raw Materials

exclusive RASTER acetate block.

Design Detail

VANNI sunglasses have a rebel soul and the new collection offers quirky combinations of the 6 RASTER acetate designs; tone on tone or with geometric detailing in contrasting colours. The layering of different colour patterns has governed the design of this collection: edgy and original.

Shapes and Colours

Shapes are ultra feminine, large ephemeral butterflies that make their presence felt, or chunky rectangles edged with sophisticated geometric detail. Frames that impress with their coloured acetate combinations and retro vibe. A collection for who wants to see and be seen. Lenses are in nylon UV 400, fully tinted to guarantee the best UV protection from the sun's harmful rays.

VANNI eyewear is made in Italy, for sure.
