

# VANNI

MADE IN ITALY, FOR SURE.

## VANNI RE-MASTER SUN Sunglasses VANNI-style

**A new collection of eyewear that reinvents the masterpieces of the past. Frames in acetate that revisit the classics of eyewear design. Iconic shapes, evergreen colours and styles that have dictated the changing look of fashion in previous decades and brought back to life with contemporary materials and finishes. As in the music and film industry, VANNI is remastering an ideal modern version of the timeless classic.**

### **Raw Material**

multi-layer acetates in different tonalities.

### **Design Detail**

VANNI sunglasses have a rebel soul, the acetate models show off rounded and rectangular rims with sculpted multi-layer acetate block.

### **Shapes and Colours**

The sunglasses bring back the '80s, big, bold and ostentatious. A revival of classic shapes, unisex round or rectangular. A combination of Havana, or black, and the transparent. A collection for who wants to see and be seen. Sun lenses are lightly mirrored in shades of silver, gold and blue.

VANNI eyewear is made in Italy, for sure.
