

MINIVI

MADE IN ITALY BY VANNI

MiniVi by VANNI
Small is wise

Small but clever. MiniVi is our new collection of petite eyewear for women that manifests the unmistakable VANNI style.

Simple, linear and fresh, frames in acetate and metal that suit the delicate female face for that sexy, sophisticated and intellectual look.

The metal models have bright contrasting colours on the front and back of the frames whereas the acetates are iridescent two tone or single colour and also available in ultra-thin versions. The original temples also characterize the collection with terminals in acetate branded with the V for Vanni. Very clever.

Gli occhiali MINIVI by VANNI sono interamente manufatti in Italia
