

VANNI

MADE IN ITALY, FOR SURE.

VANNI Monochromo

A collection of linear and contemporary glasses that celebrates the intensity and force of colour.

A symphony of pastel shades, mixed with elegance, a pleasing antidote to banality.

Raw Material:

streaked acetates in different pastel and transparent shades, for a radiancy inspired by the colours of spring.

Design detail:

every colour choice reflects the colours of natural and celestial universe; the delicate 3 dimensional transparent effect present in the graduated streaking gives this collection a vital freshness that is deliciously feminine.

Shapes and colours:

5 colours dominate the "monochrome" VANNI collection: moss green combined with brown/ochre, pink tempered by fuchsia and grey, violet mixed with different nuances of blue, aquamarine with blue and red with turquoise.

There are 4 shapes in the collection; subtly feminine, rounded variations or delicate butterflies.

VANNI eyewear is made in Italy, for sure.
