

# VANNI

MADE IN ITALY, FOR SURE.

The VANNI PIXEL distilled multicolour:  
our classic exclusive is primary

The smallest information unit in every image, the pixel, is the inspiration for our new and exclusive acetate block, finding in the essence of primary colours the balance it's looking for. Yellow, red, and white create a grid-like pattern made up of infinite squares that become three dimensional, playing on the luminosity and transparent nature of the material, creating a trompe l'oeil of full and empty spaces.

#### Raw Materials:

exclusive acetate block from our VANNI design centre.

#### The Design Detail:

the 2017 collection combines the Pixel multi-colour acetate sheet with mono-colour or Havana. Its sophisticated and vivacious personality is seen on the inside of the frame, gifting its exterior a minimal and graphic effect.

#### Shape and colours:

the 2 optical models have a feminine shape. Colours are black and bordeaux with an inside secret surprising colourful texture.

VANNI eyewear is made in Italy, for sure.
