

VANNI

MADE IN ITALY, FOR SURE.

Tangram Luxury di VANNI.
Wisdom is in the eyewear.

Tangram is an ancient Chinese puzzle made up of a square divided into seven different geometrical shapes, each in a different colour. The art of the game lies in creating as many complete figures as possible, using combinations of these parts. Legend dictates that “a Tangram champion is a champion of talent and wisdom”

Raw Material:

exclusive acetate block created by the VANNI design team.

Design Detail:

at Mido 2018 Tangram proposes 3 new acetates in block colour, combined with other sheet colours as well as exteriors in Havana, red, blue as well as elaborated cascading colour effects and milling on the base layer.

Shapes and Colours:

there are 3 new Tangram colourways, 2 with a sophisticated iridescent finish, predominantly in gold/brown and blue/turquoise and 1 with blue/brown tones. The shapes in this collection are unisex and suit any face, rounded, panthos and large rectangles with some frivolous butterfly concessions. The collection is completed by some frames with a double bridge or accentuated geometric shapes.

Tangram can be both optical and sunglasses with ultra-thin versions available.

VANNI eyewear is made in Italy, for sure.
